

VACUUM AND PRESSURE TESTER KIT

FIX 7803

Test vacuum lines, components and low pressure fuel systems.

Fine tunes carburetion and timing for peak performance and maximum fuel economy. Easy-to-read, 3-1/2" diameter face displays 0-30 inches vacuum (0-70cm) and 0-10 pounds (0-70 kPs) of pressure scales shown on both standard and metric scales. Complete with hose and adapters.

Use to check:

- ▶ Fuel pump pressure
- ▶ Mechanical condition of the engine
- ▶ Vacuum control system function
- ▶ For leaks in the intake manifold, manifold and head gaskets, piston rings, valves and vacuum lines
- ▶ Works on computer-controlled and conventional vehicles
- ▶ 3-1/2" diameter face
- ▶ Pressure relief button and 24" hose for safely disposing of gasoline and repeating tests without disconnecting gauge
- ▶ Gauge boot to protect gauge and vehicle finish
